Chapter One | Introduction

A Software Test Plan is a document describing the testing scope and activities. It is the basis for formally testing any software/product in a project.

1.1 Purpose

The purpose of Test Record describes record test of unit testing and system test of AR Map 2Go! mobile application. In this document include test case, unit testing system testing and test data. AR Map 2Go! test record consists the description of each function in the system. The Test Record Document was using for software tester to record all the result of the function for identifies the defects and the limitation of the software. From the result of each function can help developer to fix the defects and reducing the cost while the long term of maintenance.

1.2 Software Scope

The scope of test record document is testing event or activity and record the result with input and output of AR Map 2Go! application which consist of each function in the system for assessment and measurement the quality of user requirement and system requirement.

1.3 Objective

The objectives of this document to ensure the software quality that the system delivered.

- Exceed user requirements.
- Reduce the rejecting project
- Test the functional of system which includes Software Requirement Specification and Software Design Document.
- The Functional systems are correctness.
- Assessment and measurement the quality of user requirement and system requirement

1.4 Definition, Acronyms and Abbreviation

1.4.1 Key Definition Key Definition

IEEE Institute for Electrical and Electronics Engineers. Biggest

global interest group for engineers of different branches

and for computer scientists. [IEEE90]

System Test Testing conducted on a complete, integrated system to

evaluate the system's compliance with its specified requirement. System testing falls within the scope of black box testing, and as such, should require no knowledge of

the inner design of the code or logic.

Unit Testing Testing method by which individual units of source code,

sets of one or more computer program modules together with associated control data, usage procedures, and operating procedures, are tested to determine if they are fit

for use.

1.4.2 Abbreviation

KEY	ABBREVIATIONS
TC-SXX	System Test Case number
TC-UXX	Unit Testing Case number

1.5 Dependency Document

This software Test Record is depended on the following documents

- Software Project Management plan 1.1
- Software Requirement Specification version 1.1
- Software Design document version 1.1
- Requirement Traceability Matrix version 1.1
- Test Plan version 1.0

Chapter Two | System Test Record

2.1 TC-S01: The user can register a new account

Test ID	TC-S01
Test Case	The user can register a new account.
Test Description	Test for displaying the message "Registration Successfully".
Actor	User
Procedures	 Click on "Sign Up" button in the main page. Input username (E-mail address), password and confirm password. Clicks create account button.
Prerequisites Data	Users must run the application before.
Input	 Username (E-mail address) Password. Confirm password.
Expected Output	The system displays dialog to show the message "Registration Successfully".
Responsibility	Parun Pichaiwong
Test Completion Date	17 July 2016

Test Record: TR-S01: Test Date: 15 June 2014

Test case No.	Username	Password	Confirm Password	Expected Output	Actual Output	P/F

Chapter Three lUnit Testing Record

Server side

3.1 UTC-01:

Method: private boolean checkEmail(String email) {}

	`
Test ID	UTC-01
Test Case	User input the Username as Email Address format.
Test Description	The for check the user input the Email format.
Actor	User
Procedures	5. Input Username by using Email address
Prerequisites Data	Users must run application before.
Input	-
	The system not displays system message "Please input Email type"
Responsibility	Parun Pichaiwong
Test Completion Date	27 July 2016

Test case No.	Input	Expected Output	Actual Output	P/F
1	"Parun@hotmail .com"	1	1	P
2	"Parun"	0	0	P

Document Name	AR Map 2Go!_Test_Record_1.0b.docx	Owner	PP	Page	30 / 36

3	"Parun.com"	0	0	P
	(/ 422	0		-
4	"4"	0	0	P

3.2 UTC-02:

functionData.php: checkLogin();

Test ID	UTC-02
Test Case	The user can check-in via this application.
Test Description	Test for displaying the quest location page.
Actor	User
Procedures	 Select one location from the all locations in the map page. Click on the selected location. Clicks "Play" button. Clicks "Check In" button in quest location page.
Prerequisites Data	Users must be login before.
Input	-
Expected Output	The system displays the quest location page and shows check-in status message.
Responsibility	Parun Pichaiwong
Test Completion Date	29 July 2016

Document Name	AR Map 2Go!_Test_Record_1.0b.docx	Owner	PP	Page	31 / 36
Document Type	Test Record	Release Date	07 August 2016	Print Date	10 August 2016

Test case No.	Input	Expected Output	Actual Output	P/F
1	Username = "parun@hotmail .com" Password = "1"	User can login into the system	User can login into the system	P
2	Username = "admin@hotmai l.com" Password = "1234"	User can login into the system	User can login into the system	P
3	Username = "xxxx@hotmail. com" Password = "1234"	The system will show the error message is "Invalid Username or Password"	show the error	P
4	Username = "" Password = ""	The system will show the error message is "Please Input username and password"	The system will show the error message is "Please Input username and password"	P
